## **Scottish Power Renewables**

Associate Sponsors

The integration of Iberdrola and ScottishPower has created one of the largest energy companies in the world, with a total enterprise value of more than €65 billion. Iberdrola and ScottishPower have a combined installed capacity of around 40,000 MW, are world leaders in renewables (16,500 MW) and reach more than 21 million consumers in Europe and the Americas.

Renewable energy is fundamental to two of ScottishPower's key impacts – **Provision of Energy** and **Climate Change and Emissions to Air**. The significant investment in renewable energy is part of Scottish Power's commitment to providing a secure, diverse and sustainable energy supply.

## **SUST: The Lighthouse on Sustainability**

Sponsors of the EuroSun 2006 Conference Prizes

SUST: The Lighthouse on Sustainability is a new and ground breaking campaign that aims to raise awareness of sustainable design in the built environment. The unique initiative takes as its starting point the Scottish Executive's recently published 'Meeting the Needs' document, which outlines its approach to sustainable development.

The 12-month pilot campaign, developed by The Lighthouse on behalf of the Scottish Executive, engaged a wide ranging audience - from client groups, to architects, other design professionals, and community-based organisations. As a result of the success of the Sust. pilot, the Executive has funded a second extended phase running from April 2004 until March 2007.
